

## Creations in Colour Gold Coast Painters Emphasis on Quality

In this day and age its true you get what you pay for. A quotation on paper may seem cheaper however it is important to know whether you're comparing apples with apples. Are premium paints being used? Not just premium brands but premium lines of those brands! Is the time going to be spent in preparation, which is so important when painting. As our references show we spend the time needed and use premium materials to finish with a first class job. I still genuinely enjoy the transformation that paintwork can achieve.

We at Creations in Colour understand you need to work to a budget & we can work with that, however investing more into the job the first time can payoff with years of lasting value.

I have been painting for over 20 years on the Gold Coast, self-employed for just over half that time. I am fully licensed, fully insured & a member of the Master Painters. Tradesmen employed are highly skilled in their field. We are a small team normally concentrating on one job at a time, taking pride in our work to give a quality finish. We respect your belongings & take care to leave your property as we found it, except to add a glowing paint job of course!.

Thank you for taking the time to read this, if you decide not to use Creations in Colour I wish you all the best with your project. Please call me if you have any inquiries.
